

SPECIFICATION SHEET

Name of Product : **RINGO OCTOMAT PLUS**

Specification	: 100% Rubber
Manufacturing Method	: Rubber Molding in heavy hydraulic press under high temperature
Colour	: Black
Type	: Solid Heavy duty rubber mat
Compound	: NR mixed with SBR
Hardness (Shore A)	: 70° +/- 5°
Density (SG)	: 1.25
Min. Temperature	: -30
Tensile Strength MPa	: 4
Properties	: Anti-slip
Thickness	: 23mm
Sizes	: 100x150 cm,
Tolerance Limit	: +/- 5% on general values
Applications	: Shall be used for a multitude of Industrial, Retail and Domestic applications which include wet area ground stabilization, wet area machine and person station areas, wet processing plants and door entrances
Features	: Excellent and High ground stabilization Good anti-fatigue characteristics, High impact resistance, Anti-slip finish, Low Maintenance.
Packing	: Palletized
Cleaning	: Sweep, Vacuum
Storage Instructions	: Keep well wrapped in a dry place to avoid fungal infections, Store with dry silica gel, if infected with Fungus clean with Silicon.
