Tested sample

Safe-spiral ASTA 20 mm and 110 mm variants

Summary of the test

Based on the tests describe in test report EUFI29-19002640-T1, it was proven that the Safe-spiral ASTA products fulfil the requirements for surface resistance in EN ISO 80079-36 Clause 6.7. It can be determined, that the when the spiral is properly earthed according to manufacturer's installation instructions, it does not pose a risk for electrostatic discharges.

Research report No EUFI29-19002640-T1. Dated June 10, 2019.

Test results cover all Safe-spiral ASTA products

from 20 mm to 110 mm of normative outer diameter.
